

Sniper 2RS - 2 Rail System.
Salming Sniper blade has a duo cavity construction, meaning that the playing surface on the fore hand side has an outer and a smaller inner radius.

TipCurve™ - a unique angle property at the blade end of the shaft. In combination with the KickZone™ technology it enables you to shoot harder.

KickZone™ - by moving down the kick point area by 17% we have created a higher frequency kick back property - wich provides harder shots.

Lasse Riitesuo, Center, Hapsee. Finish National Team. Wikipedia stats: http://fi.wikipedia.org/wiki/Lasse_Riitesuo

increased ball control
harder sweeper shots
passing precision
